

The octagonal game board is the main play area.

Right side panel provides interactivity and information to the user

The user presses 'Roll' to generate 4 dice. Possible combinations are given in adjacent text box.

Player may drag and drop dice elements into pair boxes, system calculates some valid moves.

Runner box shows user how many runners they must place before choosing to roll again, ending their turn, or going bust.

Bottom right text box indicates turn status (in this prototype, the bust prompt is given for illustrative purposes)

Bottom left panel contains navigational buttons (quit, options menu, rules screen)

Top left panel has title graphic and perhaps other pertinent statistics like score or game count
